NeoColab_REC_CS23231_DATA STRUCTURES

REC_DS using C_Week 2_COD_Question 1

Attempt : 1 Total Mark : 10 Marks Obtained : 10

Section 1: Coding

1. Problem Statement

Your task is to create a program to manage a playlist of items. Each item is represented as a character, and you need to implement the following operations on the playlist.

Here are the main functionalities of the program:

Insert Item: The program should allow users to add items to the front and end of the playlist. Items are represented as characters. Display Playlist: The program should display the playlist containing the items that were added.

To implement this program, a doubly linked list data structure should be used, where each node contains an item character.

Input Format

The input consists of a sequence of space-separated characters, representing the items to be inserted into the doubly linked list.

The input is terminated by entering - (hyphen).

Output Format

The first line of output prints "Forward Playlist: " followed by the linked list after inserting the items at the end.

The second line prints "Backward Playlist: " followed by the linked list after inserting the items at the front.

Refer to the sample output for formatting specifications.

Sample Test Case

```
Input: a b c -
    Output: Forward Playlist: a b c
    Backward Playlist: c b a
    Answer
    #include <stdio.h>
    #include <stdlib.h>
    struct Node {
    char item;
       struct Node* next;
       struct Node* prev;
    struct Node*tail;
    void insertAtEnd(struct Node** head, char item) {
      struct Node* newnode=(struct Node*)malloc(sizeof(struct Node));
      newnode->item=item:
      newnode->next=NULL;
      newnode->prev=NULL;
      if(*head==NULL){
}else{
        *head=tail=newnode:
        tail->next=newnode;
```

```
newnode->prev=tail;
   tail=newnode;
void displayForward(struct Node* head) {
  struct Node* temp=head;
  while(temp!=NULL){
    printf("%c ",temp->item);
    temp=temp->next;
  }
  printf("\n");
void displayBackward(struct Node* tail){
struct Node* temp=tail;
  while(temp!=NULL){
    printf("%c ",temp->item);
    temp=temp->prev;
  printf("\n");
}
void freePlaylist(struct Node* head) {
  struct Node* temp=head;
  while(temp!=NULL){
    Node* nextnode=temp->next;
    free(temp);
    temp=nextnode;
  head=NULL;
  tail=NULL;
int main() {
  struct Node* playlist = NULL;
  char item;
  while (1) {
    scanf(" %c", &item);
    if (item == '-') {
      break;
    insertAtEnd(&playlist, item);
```

2116240701413

```
struct Node* tail = playlist;
while (tail->next != NULL) {
    tail = tail->next;
}

printf("Forward Playlist: ");
displayForward(playlist);

printf("Backward Playlist: ");
displayBackward(tail);

freePlaylist(playlist);

return 0;
}

Status: Correct

Marks: 10/10
